1. Business Requirements

Definition

Business requirements describe **why the software is being developed** and what business objectives it should achieve.

Example: Reduce manual paperwork and improve the efficiency of library services.

2. User Requirements

Definition

User requirements describe the services the users expect from the system.

Example

Students want to search books by title.

Librarians want to generate borrowing reports.

3. Functional Requirements

Definition

Functional requirements specify **what functions or services the system shall provide**.

Examples

- The system shall allow users to log in.
- The system shall search books.
- The system shall issue books.
- The system shall return books.
- The system shall calculate fines.

4. Non-Functional Requirements

Definition

Non-functional requirements specify **quality attributes or constraints** of the system

Examples

Quality Attribute	**Example**
Performance	Search results shall appear within **2 seconds**.
Security	Passwords shall be encrypted.
Reliability	System availability shall be **99.9%**.
Usability	New users shall complete book searches without training.

Scalability	Support **10,000** concurrent users.

5. Domain Requirements

Definition

Domain requirements are derived from the **application domain**, organizational policies, industry standards, or government regulations.

Examples

- Students may borrow a maximum of **5 books**.
- Books cannot be renewed if reserved by another student.
- Fine calculation follows university policy.
- Only librarians can delete book records.

Summary Table

Type	Answers the Question	Example
Business Requirement	Why is the system needed?	Automate the university library.
User Requirement	What do users need?	Students want to search books online.
Functional Requirement	What shall the system do?	The system shall allow users to borrow books.
Non-Functional Requirement	How well shall the system perform?	Search results shall appear within **2 seconds**.
Domain Requirement	What business rules or policies must be followed?	A student may borrow at most **5 books**.
