BANGLADESH UNIVERSITY OF PROFESSIONALS (BUP)
Department of Information and Communication Engineering (ICE)
Program: B.Sc. in ICE, BICE-2024
Class Test 2, Course Title: Web Technologies, Course Code: ICE 3205
Time: 20 minutes **Date: 30/08/2026**

Name:

ID:

1. Explain CSS Flex. Describe one example where Flex is used. **[2]**

2. a) Consider the "style.css" file. In the file, Design the following tasks with CSS code **[2]**

   i. Set the font style all paragraphs to be italic

   ii. Set the font color of all headers which are inside a div to blue.

b) Now, in the "sample.html" file, Demonstrate how the above CSS styles can be added in following situations – **[2]**

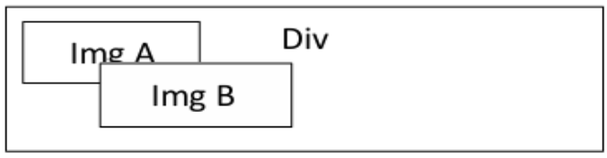

i. CSS as External styles

ii. CSS as Internal styles

3.a) Suppose in a container Div, you have two images A is left aligned and B is right aligned**.[2]**

b) Now, update and Design the HTML and CSS code so that the positioning of image B changes as follows such that from both left and top it is offset by 50 px: **[2]**

Write down the code for both figures.
